1. Introduction

1.1 Cafe Ali kya hai

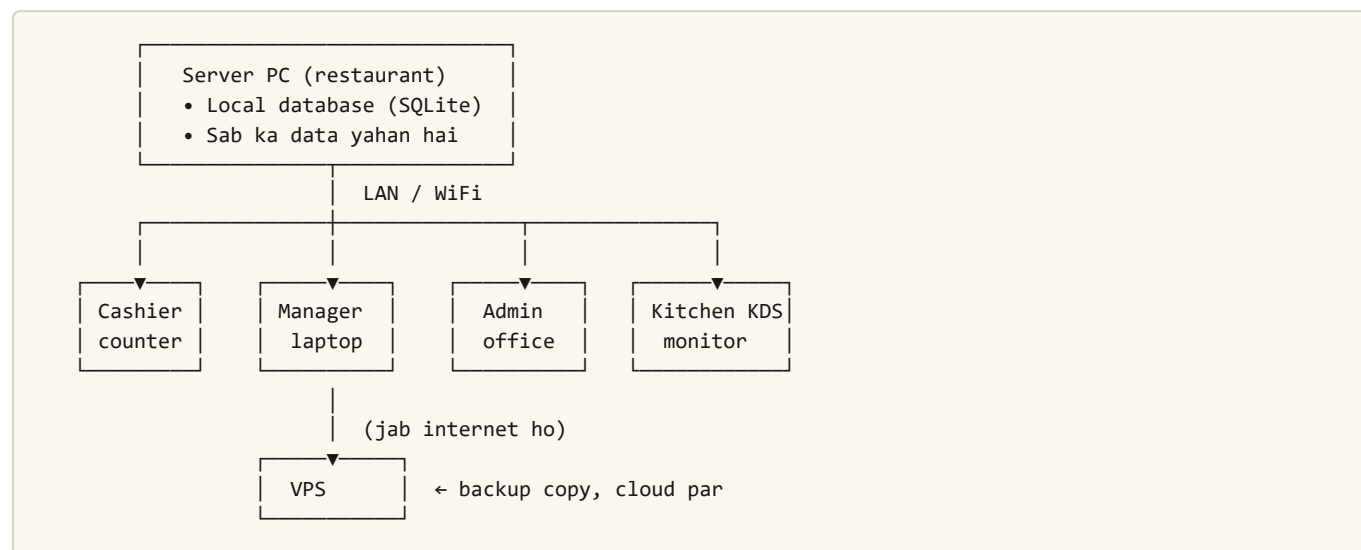

Cafe Ali ek **restaurant management software** hai jo aap ke restaurant ka poora din-bhar ka kaam ek hi jagah sambhalta hai — order lena, table sambhalna, bill banana, kitchen ko parchi bhejna, stock ghatana, staff ki hazri, tankhwah, hisab-kitab aur din ke aakhir ki closing report.

Ye ek **desktop software** hai (Windows par install hota hai), website nahi. Iska matlab ye hai ke **internet band ho jaye tab bhi restaurant ka kaam nahi rukta** — sara kaam restaurant ke andar wale server PC par hota hai. Internet sirf backup ke liye chahiye hota hai.

1.2 Ye system kis ke liye hai

KAUN	KYA KARTA HAI
Malik / Admin	Poore restaurant ki nigrani — paisa, reports, staff, settings, aur har ahem manzoori (approval).
Manager	Rozana ka operation — floor, staff, stock, cashier se cash lena.
Cashier	Order punch karna, bill lena, apna cash drawer chalana.
Kitchen / Chef	Kitchen screen par order dekhna aur recipe banana.

1.3 System kaise chalta hai (local server + devices)

Do ahem baatein:

1. **Ek device par kiya gaya kaam doosre device par khud-ba-khud (roughly 1 second mein) nazar aa jata hai.** Refresh dabane ki zaroorat nahi.
2. **Server PC chalna zaroori hai.** Agar server band ho ya network toot jaye, to baaqi devices par "Cannot reach the server" ka message aayega.

1.4 Guide ka daayra

Is guide mein app ka **har page** aur har page ka **har button, field, dropdown aur icon** shamil hai. Har page ke liye ye cheezein di gayi hain:

- Page ka naam aur route
 - Page kis kaam ka hai
 - Kaun kaun is page ko khol sakta hai
 - Screenshot ki jagah
 - **Elements table** — har control ka poora tafseeli bayan
 - "Ye kaam kaise karein" — numbered steps
 - Us page par aane wale error messages aur unka hal
-

2. Getting Started

2.1 Zaroori cheezein (requirements)

CHEEZ	TAFSEEL
Operating system	Windows 10 ya us se naya
Server PC	Ek dedicated computer jo restaurant ke andar hamesha chalta rahe. Isi par data mehfooz hota hai.
Network	Sab devices ek hi WiFi/LAN par hone chahiye
Internet	Rozana kaam ke liye zaroori nahi . Sirf cloud backup ke liye chahiye.
Printer	Receipt printer (bill aur KOT parchi ke liye) — Windows ka default printer set hona chahiye
Screen	Kam se kam 1366×768. Kitchen Display (KDS) ke liye alag monitor behtar hai.

Note: App ko phone ya tablet par bhi kholna mumkin hai (browser ke zariye), lekin ye asal mein **desktop ke liye banaya gaya hai**.

2.2 App kholna

1. Desktop par **Cafe Ali** ka icon double-click karein.
2. App khulte hi seedha **Login** screen aati hai.
3. Agar screen par "Cannot reach the server" likha aaye, to iska matlab hai ke server PC band hai ya network mein masla hai — Section 6 (Troubleshooting) dekhein.

2.3 Login karna

Section **4.1 Login** mein poori tafseel di gayi hai. Mukhtasar tareeqa:

1. **Username** likhein (chhote haroon mein — capital/small ka farq nahi parta).
2. **Password** likhein.
3. **Sign in** dabayein.

Login ke baad app aap ko **aap ke role ke pehle page** par le jata hai:

ROLE	LOGIN KE BAAD KAHAN POHANCHTE HAIN
Admin	Dashboard
Manager	Dashboard
Cashier	New Order (POS) — pehle cash drawer kholne ka box aata hai
Kitchen	Kitchen page

2.4 Naya account banana (signup)

Naya staff member khud apna account bana sakta hai, lekin **jab tak Admin manzoori na de, wo app istemal nahi kar sakta.**

1. Login screen par **Sign up** par click karein.
2. Full name, Username, Password, Confirm password bhar kar **Create account** dabayein.
3. Ab Admin ka intezaar karein. Admin **Approvals** page se aap ka role (Admin / Manager / Cashier / Kitchen) chun kar **Approve** dabayega.
4. Manzoori ke baad dobara login karein — ab app khul jayega.

Tafseel ke liye Section **4.2** aur **4.4** dekhein.

2.5 Password badalna / bhool jaana

⚠ Login screen par "Forgot password" ka koi link nahi hai. Ye jaan-boojh kar hai — password sirf Admin reset kar sakta hai.

SURAT-E-HAAL	KYA KAREIN
Apna password badalna hai (aur purana yaad hai)	Sirf Admin ke paas Settings page hai. Baaqi roles apne manager/Admin se kehen. → Settings > Login Passwords > "My password"
Password bhool gaye	Admin se rabta karein. Admin: Settings > Login Passwords > us shaks ka naam chunein > naya password daal kar Change Password dabayein.
Naye employee ko pehli baar login dena hai	Admin: Settings > Login Passwords > employee chunein > username + system role + password daal kar Create Login dabayein.

Password ka usool: kam se kam **6 characters**.

⚠ Jab Admin kisi ka password reset karta hai, to us shaks ke **saare devices se session khatam ho jata hai** — unhein naye password se dobara login karna parta hai. Ye jaan-boojh kar hai, taake khoya hua ya ghalat session band kiya ja sake.

2.6 Zabaan badalna (English ↔ اردو)

Har page ke ooper daayein taraf **EN | اردو** ka toggle hai.

- **EN** — poora app English mein.
- **اردو** — admin/reports wale pages Urdu mein aur **RTL** (dayein se baayein) ho jate hain, aur numbers bhi Urdu ke andaaz mein likhe jate hain.
- **Ahem:** Cashier ke rozana kaam wale pages (**New Order/POS, Orders, Billing**) hamesha English aur LTR hi rehte hain, chahe zabaan Urdu chuni ho. Ye jaan-boojh kar hai, taake counter par kaam ki raftaar aur receipt ki tarteeb kharab na ho.
- Aap ka chunaav **yaad rakha jata hai** — agli baar app kholne par wahi zabaan hogi.

2.7 Log out karna

Sidebar mein sab se neeche aap ke naam wale card par **log-out ka icon** (↵) hai.

ROLE	LOG OUT DABANE PAR KYA HOTA HAI
Admin / Manager / Kitchen	Seedha log out ho jate hain.
Cashier (drawer khula ho)	Ek box aata hai: " Log out — kya karein? " — pehle ye tay karna parta hai ke drawer band karna hai ya thori der ke liye pause. Tafseel Section 4.0.4 mein.

3. User Roles aur Permissions

3.1 Chaar roles — ek nazar mein

ROLE	KAAM	SAB SE AHEM IKHTIYAR	SAB SE AHEM PABANDI
Admin	Malik / owner-level. Poore system ka control.	Recipe approve karna, bill cancel karna, Settings, staff signup approve karna, sab ka cash apne paas jama karna	Cash drawer nahi chala sakta ka matlab nahi — Admin drawer chala sakta hai, lekin cash forward nahi kar sakta (wo aakhri manzil hai)
Manager	Rozana operation ka incharge.	Stock kharidna, staff, payroll, discount, cashier se cash lena aur Admin ko aage dena	Cash drawer nahi chala sakta; recipe approve nahi kar sakta; bill cancel nahi kar sakta; staff signup approve nahi kar sakta
Cashier	Counter par order aur bill.	Order punch karna, bill lena, apna cash drawer chalana, "Most Ordered" list set karna	Discount nahi de sakta; bill cancel nahi kar sakta; complimentary nahi kar sakta; Dashboard/Reports/Inventory nahi dekh sakta
Kitchen	Chef / kitchen staff.	Recipe banana, ingredient ki request dena, KDS dekhna	Sirf 2 page dekh sakte hain (Kitchen aur KDS). Apni banayi recipe khud approve nahi kar sakte.
<i>(Pending)</i>	Naya signup jiski manzoori baaqi hai.	Kuch nahi	Har page band. Sirf "Awaiting approval" screen dikhti hai.

3.2 Page access table

Nishaniyan:  = poora access ·  = sirf dekh sakte hain ·  = bana/add kar sakte hain (sab kuch nahi) ·  = ye page nazar hi nahi aata

Note: Jo page kisi role ke liye ✗ hai, wo us role ke sidebar mein **nazar hi nahi aata**. Agar koi seedha us ka address kholne ki koshish kare, to app khud us ke apne pehle page par wapas bhej deta hai.

3.3 Action-level permissions table

wastageApproval	Wastage approve karna	✓	✓	✗	✗

Note: `wastageReport` aur `wastageApproval` abhi sirf **policy** ke taur par likhe gaye hain — wastage ka feature app mein abhi banaya nahi gaya. [CONFIRM: kya wastage feature agle phase mein banana hai?]

3.4 Separation of duties — kyun kuch kaam alag rakhe gaye hain

Kuch pabandiyan "kami" nahi, balke **jaan-boojh kar** rakhi gayi hain, taake ek hi banda akela paisa ya stock idhar-udhar na kar sake. Inhein badalne se pehle zaroor sochein:

USOOL	KYUN
Sirf Admin recipe approve karta hai (Kitchen banata hai)	Ghalat recipe har order par khamoshi se ghalat stock kaat degi. Isliye jo banaye wo approve na kare.
Manager cash drawer nahi chala sakta	Manager wo shaks hai jo cashier se cash wasool karta hai. Agar wohi drawer bhi chalaye, to cash dene wala aur lene wala ek hi banda ho jayega — poori chain bekar.
Sirf Manager cash aage forward karta hai; Admin nahi	Cash ka rasta hai: Cashier → Manager/Admin → Admin. Admin aakhri manzil hai, us ke aage koi nahi.
Handover sirf wohi role accept karta hai jise bheja gaya	Jo cash le raha hai, wohi dastakhat karega — koi doosra Manager beech mein click kar ke sign nahi kar sakta.
Manager bill cancel nahi kar sakta	Bill cancel karna paisa ghayab karne ka sab se aasan tareeqa hai — isliye sirf Admin.
Manager staff signup approve nahi kar sakta	Warna Manager apna hi banaya hua account approve kar ke extra ikhtiyar le sakta tha.

4. Page-by-Page Guide

4.0 Har page par mojud cheezein (Sidebar aur Header)

Ye koi alag page nahi — ye wo dhaancha (frame) hai jo **har page ke ird-gird** hamesha mojud rehta hai. Isliye ise sab se pehle samajh lein; aage har page ki tafseel mein ye cheezein dobara nahi likhi jayengi.

Kaun dekhta hai: Har logged-in user. Sirf **Kitchen (KDS)** page ye frame nahi dikhta — wo poori screen par chalta hai kyunke wo kitchen ke monitor par bina kisi ke chalta rehta hai.

Group ke bare mein 3 ahem baatein:

1. Jis group ke andar aap ka mojudaa page hai, wo **khud-ba-khud khul jata hai** — page kabhi chhupa nahin rehta.
2. Agar kisi group mein aap ke role ke liye **sirf ek hi page** ho, to wo dropdown nahi banta — seedha ek link ban jata hai.
3. Agar kisi group mein aap ke role ke liye **koi bhi page na ho**, to wo group bilkul nazar hi nahi aata (khali group nahi dikhta).

Kaun access kar sakta hai: Har koi (login se pehle). Jo pehle se logged in ho, use ye page nazar nahi aata — app use seedha andar bhej deta hai.

4.3 Awaiting approval

Ye page kis kaam ka hai

Ye wo screen hai jo aap ko tab dikhti hai jab aap ka account **ban to gaya hai lekin Admin ne abhi manzoori nahi di**. Is halat mein app ka koi bhi page nahi khulta — aap chahe kuch bhi address daalein, app aap ko wapas isi screen par le aata hai.

Kaun access kar sakta hai: Sirf wo account jiska role abhi **Pending** hai. Baaqi har koi khud-ba-khud yahan se hat jata hai.

4.4 Approvals

Route: `/approvals` · **Sidebar:** **People** > **Approvals**

Ye page kis kaam ka hai

Yahan Admin un logon ki darkhwasten dekhta hai jinhon ne khud signup kiya hai, aur har ek ko **role de kar Approve** ya **Reject** karta hai. Jab tak yahan se manzoori na mile, wo shaks app istemal nahi kar sakta.

Kaun access kar sakta hai:  **Sirf Admin.** Manager, Cashier aur Kitchen ko ye page sidebar mein nazar hi nahi aata.

 Ye pabandi jaan-boojh kar hai — agar Manager bhi approve kar sakta, to wo apna banaya hua account khud approve kar ke zyada ikhtiyar le sakta tha.

Ye kaam kaise karein

A. Stock kharid kar darj karna

1. Item search karein.
2. **Buy Stock** dabayein.
3. **Quantity** aur **Rate per unit** likhein.
4. Agar bill ki asli raqam alag hai to **Total bill (Rs)** mein wohi likhein.

 **Chef bhi nayi cheez maang sakta hai.** Recipe banate waqt chef "Request New Ingredient" bhejta hai, jo **Dashboard** par Admin ke paas manzoori ke liye aata hai (Section 4.5.6). Wahan se approve hone par cheez khud inventory mein bann jati hai.

4.14 Kitchen (Recipes)

Route: `/kitchen` · **Sidebar:** **Menu & Kitchen** > **Kitchen**

Ye page kis kaam ka hai

Yahan **recipes** banti aur manzoor hoti hain. Recipe ka matlab hai: "ye dish banane mein inventory se kya kya aur kitna lagta hai". Jab kisi dish ki recipe **approved** ho jati hai, to us dish ka order lagte hi **stock khud-ba-khud kat jata hai** — koi manually ghatane ki zaroorat nahi.

Kaun access kar sakta hai:

ROLE	ACCESS	KYA KAR SAKTE HAIN
Kitchen (Chef)	✔ Poora	Recipe banana aur edit karna, nayi ingredient maangna
Admin	👁 View + approve	Recipe Approve / Reject karna, aur Delete karna
Manager	👁 Sirf dekh sakta hai	Na bana sakta hai, na approve kar sakta hai
Cashier	✗	Nazar nahi aata

⚠ **Ye jaan-boojh kar bata hua hai:** jo recipe banaye wo khud approve na kare. Ghalat recipe har order par khamoshi se ghalat stock kaat degi, isliye approve karne ka ikhtiyar sirf Admin ke paas hai.

⚠ Check-in / Check-out ke khane sirf padhne ke liye hain. Yahan seedha likha nahi ja sakta — ye machine ka data hai. Badalne ke liye **Override** hi ek rasta hai, aur wo record chhorta hai.

⚠ Ahem ittila — pehle zaroor parhein

Is page par **"Present days"** ka number asal hazri se nahi aa raha. Code (`frontend/src/utis/payroll.js`) mein hazri ka hisab abhi **khud-saakhta (generated) demo data** se lagta hai — file mein saaf likha hai: *"Attendance is deterministic mock data ... swap monthAttendance() for a real query when wired."*

Iska matlab:

- Har staff ke liye number **hamesha wohi rehta hai** (badalta nahi), lekin wo **Attendance page ke asal record se juda hua nahi hai**.
- Isliye **Calculated salary** aur **Net salary** bhi abhi asal hazri par mabni nahi hain.
- **Sunday** ko chhutti mana jata hai; baaqi din "working day" ginte hain. Har staff ke 0 se 3 din tak "absent" laga diye jate hain.

Advances ka hissa asli hai — wo backend mein mehfooz hota hai.

1	Income (sabz)	Us din/maheene ki wasooli (POS sale)
2	Udhaar (credit) (amber)	Kitna udhaar par gaya — "On account · not yet received". Ye paisa abhi aaya nahi hai
3	Expenses (surkh)	Kul kharche. Neeche amber mein: + Maintenance: Rs. ... Maintenance is figure mein shamil nahi — uska apna alag box hai
4	Net Profit	Income – Expenses – Maintenance. Neeche "Profit" ya "Loss"
5	Profit Margin	Nafa income ka kitne percent hai

Monthly mode mein "Expenses" ke andar payroll bhi shamil hai ("Incl. payroll"). Aur payroll ka hisab abhi **generated attendance** se lagta hai (Section 4.17 ki warning dekhein) — is liye maheene ka **Net Profit is waqt poori tarah bharosay ke laiq nahi**. Din ka (Daily) hisab is se mutasir nahi hota, kyunke us mein payroll shamil hi nahi hota.

4.18.3 Complimentary orders ka panel

2	Neeche	"est. cost · bill forgone Rs. ..." — jo bill chhora gaya
3	Table	Har order ki alag line: Order · Table · Reason · Authorized By · Bill Forgone · Est. Cost

Usool: Kitabon mein **cost** likha jata hai, bill ki raqam nahi — kyunke asal nuqsan sirf ingredients ka hai.

#	PANEL	KAB DIKHTA HAI	KYA BATATA HAI

6	"—" (Action column)	Label	Ye line yahan se delete nahi ho sakti	Ye line kisi aur kaam se bani hai (stock purchase, salary advance). Use usi page se wapas lena parta hai

⚠ **Locked lines kyun hain:** agar aap Buy Stock ka kharcha yahan se delete kar dein, to stock to barha hua rahega lekin uska kharcha ghayab ho jayega — hisab bigar jayega. Isliye aisi line sirf apne asal page se hat sakti hai.

[Screenshot: reports]

i "Session" kya hai: restaurant ka din calendar ke din se nahi milta (2 baje khulta hai, agle din 3 baje band hota hai). Isliye report **ek closing se agli closing tak** ke arse par banti hai, kisi ek tareekh par nahi. Report ke ooper hamesha **"Recording period"** likha hota hai taake arsa saaf rahe.

4.22.1 Din band karne ki 3 shartein

3	Kuch naya band karne ko ho	Khaakistari patti: "The day is already closed — no new sales since the last closing."	Naya order lein — naya session khud shuru ho jayega

⚠ Unpaid bill ki rok kyun lagi hai: pehle closing aisi bills ko khamoshi se chhor deti thi, jis se un ka paisa kisi hisab mein aata hi nahi tha. Ab har bill ka anjaam tay karna zaroori hai.

6. Troubleshooting / FAQ

6.1 Connection aur server ke masail

"Cannot reach the server. Is the local backend running?"

Sab se aam masla. Tarteeb se ye jaanchein:

1. **Server PC chalu hai?** Wo computer jis par system chalta hai — dekhein ke on hai aur so (sleep) nahi gaya.
2. **Aap ka device usi WiFi/network par hai?** Doosre WiFi par ho to server nahi milega.
3. **Server PC par app chal raha hai?** Server par ja kar dekhein ke system chal raha hai.
4. **Server PC khud thik kaam kar raha hai?** Usi PC par app khol kar dekhein. Wahan chale aur baaqi device par na chale — to network ka masla hai.
5. Kuch na chale to **server PC ko restart** karein aur 2 minute baad dobara koshish karein.

 **Data zaya nahi hota.** Sab kuch server PC par mehfooz hai. Connection wapas aate hi sab dobara nazar aa jayega.

Server restart ke baad sab log out ho gaye

Ye normal hai, bug nahi. Server restart hone par har device ko dobara login karna parta hai. Ye jaan-boojh kar hai — isi wajah se kisi khoye hue device ka session band kiya ja sakta hai.

Ek device par kaam kiya, doosre par nazar nahi aa raha

1. 2–3 second intezaar karein — updates apne aap aate hain.
2. Phir bhi na aaye to page refresh karein (**F5**).
3. Phir bhi nahi? Us device ka network toota hua hai — 6.1 wale steps dohrayein.

"Half" order par poora stock kat raha hai	Us option ka Portion 1 rakha hua hai	Menu > Edit Item mein Half ka Portion 0.5 karein

6.7 Attendance aur payroll

MASLA	WAJAH	HAL
Sab log Absent dikha rahe hain	Machine se koi record nahi aaya	Settings > Attendance Machine se connection jaanchein; Server Health > Sync Attendance Now dabayein
Ek shaks ki hazri nahi aa rahi	Uska Attendance Machine ID darj nahi hai	Employees > Edit se machine ka ID likhein

Koi employee payroll mein nahi aa raha	Uska record Inactive hai	Employees mein uska Status toggle chalu karein

6.8 Aam sawalat (FAQ)

S: Kya internet band hone par kaam ruk jayega? J: Nahi. Poora kaam restaurant ke andar wale server par hota hai. Internet sirf cloud backup aur WhatsApp report ke liye chahiye.

S: Kya delete kiya hua order wapas aa sakta hai? J: **Order kabhi delete hi nahi hota.** Cancel hone par bhi wo "Cancelled" ban kar record mein rehta hai — wajah, kis ne kiya aur kab, sab ke saath.

S: Din band karne ke baad purana data mit jata hai? J: Nahi. Sirf "live" totals sifar hote hain. Saare orders **Reports** aur **Closing History** mein waise hi rehte hain.

S: Ek hi waqt mein kitne log app istemal kar sakte hain? J: Jitne chahein. Har ek ka apna login hota hai aur sab ko live update milta rehta hai.

S: Cashier discount kyun nahi de sakta? J: Ye jaan-boojh kar hai. Discount se bill kam hota hai, isliye ye ikhtiyar sirf Admin/Manager ke paas hai.

S: Manager bill cancel kyun nahi kar sakta? J: Bill cancel karna paisa ghayab karne ka sab se aasan tareeqa hai — isliye sirf Admin.

S: Manager apna cash drawer kyun nahi chala sakta? J: Manager wohi hai jo cashier se cash **wasool** karta hai. Agar wohi drawer bhi chalaye, to dene wala aur lene wala ek hi banda ho jayega.

S: Purani qeemat wale bill qeemat badalne par badal jate hain? J: Nahi. Har order apni us waqt ki qeemat aur GST rate mehfooz rakhta hai.

S: Complimentary order ka nuqsan kaise ginte hain? J: Bill ki raqam nahi, balke **ingredients ka kharcha (cost)** — kyunke asal nuqsan wohi hai.

S: Backup kab hota hai? J: Rozana khud-ba-khud. Admin **Settings > Server Health > Backup Now** se kabhi bhi foran backup bana sakta hai.

S: App ki zabaan Urdu kar dein to kya POS bhi Urdu ho jayega? J: Nahi. **POS, Orders aur Billing** hamesha English aur LTR rehte hain — counter par raftaar aur receipt ki tarteeb ke liye. Baaqi admin pages Urdu ho jate hain.

S: Ek item do counters par lag sakta hai? J: Nahi. Ek item hamesha **sirf ek** counter par hota hai. Naye counter par lagane se purane se khud hat jata hai.
